## WHO WILL YOU BE HELPING?

Every year over a thousand animals arrive into our care in need of help. If we cannot reunite an animal, we will rehabilitate them and then rehome them.

Some animals need to be with us longer than others, this may be due to medical or behavioural issues. One example of that is Finn.

Finn is almost 14yrs old and he has been with us over a year now. He came to our care under very sad circumstances following the death of his owner. Finn arrived with us in a very bad way, he was very thin with several lumps on his body and head along side some obvious skin issues.

The first couple of weeks were very difficult for poor Finn but as soon as he was feeling a bit brighter in himself, we were able to start tests to try and get a clearer picture of exactly what was going on with our little old man.

Finn's test results came back to show Finn had Bilateral Nuclear Sclerosis which really affects his vision and Addison's, an autoimmune disease which affects the function of the adrenal gland. After months of several different treatments, Finn is now stable and steady on one medication, which he will be on for the rest of his life.
